Home Treatment for

Tuberculosis

Consumptive patients need no longer dread either the fats that formerly overtook all sufferers from lung trouble, or costly and often terribly inconvenient journeys far from home to other climates or to some expensive sanatorium. Hundreds are now staying quietly at home curing themselves at no expense beyond the cost of a few bottles of medicine. Here is one who speaks from experience: 220 S. 4th St., Colwyn (Darby), Pa. "Gentlemen: For four years I was troubled with cough, which gradually became worse: I had night sweats and pains in my chest. I was losing my appetite and had become so thin and weak I could not attend to my household daties. A physician pronounced my case Consumption. Not being satisfied, I was examined by the physicians of the Polyclinic Hospital; they also prenounced the disease Consumption, which was proven later by an examination of spatum, as This evolution to allow me to go until bad tried Eckman's Alterative. FOUR LINES FOR 25 CENTS

F. B. Cate Real Estate Agency The following is a summary of prop-

erty we wish to sell.

MILT. The size of the main floor of the mill is about 10 x 40 feet. Arranged conveniently with bins and sponts so that meal, cracked eorn and oats can be sponted in bogs. A run of stone to grind the meal, which runs directly in the bin from the elevator. We had an iron mill substituted for two other run of stone, the change costing no \$700, which greatly adds to the speed of grinding, also to the quantity. We have just completed a new flume. Corn is drawn from the track in a wagen holding site pounds and spouted directly to a bin in the cellar holding four loads. From this bin it is carried by an elevator to a bin holding 1400 bushels or to a bin in the flour house holding soo bushels. Gats are carried to another part of the mill to a bin holding about 1000 bushels. Good water power, electric lighted, and telephone connections. The size of the main floor of the mill is about

FLOUR HOUSE. Size is about 17 x 21 feet, at the right side of the mill. Divided so that a part can be used as storage of corn, equipped with spouts to and from the bin. When not in use for corn this space is very convenient for flour and feed. It is electric lighted.

STORE HOUSE. Size is about 30x40 feet. Connected with the mill. Used as a stock room for the storage of bagged feed. The door from this room leads through the office. Electric lighted.

Located beside the track on leased land from the railroad. Holds about ten cars. Phosphate House—The use of this house given us free for the handling of the Bradley Barn-Size about 40x21 feet. Has six stalls, nd story for hay, and is electric lighted.

SECOND STORE ROUSE.

Curriage Shed-The size is about 40 x 31 Manure Shed-There is a manure shed at he left of the barn, where we now have four sigs. The size is eleven and a half by twenty-HOUSE.

A ten-room house beside the mill. Fleetric lighted. A good garden.

BUSINESS.

BUSINESS.

We have a good coal business that goes with the mill. We have bandled Bradley's Fertilizer here for several years and the Bradley Fertilizer furnishes all the money for this business. The flour and feed business can be conducted here with less expital than in other mills. We do not intend to carry any accounts over thirty days and we also have a very large cash trade. Marshfleid is located near montpeller and the mill is connected with E. W. Bailey & Co. by telephone. Feed can be bought of them cheaper than at any other place in the United States. Our clear net gain this year, aside from small expenses, was \$164.53. We have a very large custom grinding trade and we calculate that this branch alone will keep a man and pay for all the necessary repairs, so that any hing else made is clear prefit.
